

4. Selection Criteria

All proposals will be refereed by national and international experts and their comments assessed by the Programme Committee.

All proposals should meet the following criteria:

Research Quality

The topic must be of current international importance or likely to be of future international importance

The invited speakers and participants should be of high calibre (or younger people with high potential) **and** appropriate to the aims of the meeting

The aims and objectives of the meeting must be clear and distinctive

Methodology and Resources

The proposed structure (e.g. numbers, length, organisation of presentations, level of exposition) should be that best able to meet the objectives of the proposal

The Organisers should have the knowledge and experience to manage the scientific aspects of the meeting

The resources requested should be reasonable

Research Impact

The meeting must have the potential to be both internationally significant and significant for UK workers.

Significance may be judged in terms of a workshop's potential impact beyond its own specific mathematical context or in disciplines outside mathematics.
