# OLIVER WYMAN

## Financial Services Quantitative Analytics

### Looking for a specialist quant role?

Financial Services Quantitative Analytics is a new business unit of Oliver Wyman, set up in 2017 in Newcastle-upon-Tyne, Milan and Berlin to focus on solving our clients' complex, quantitative problems.

We are a dynamic, fast-growing team of quantitative analytics specialists.

We work closely with colleagues across Oliver Wyman to cover a global footprint: Our clients are the leading financial institutions across the world.

We are looking for talented, entrepreneurial and ambitious graduates with backgrounds in quantitative disciplines (Maths, Physics, Computer Science, Engineering, Economics) to join our team.

## Entry Level Analyst roles and internships available for 2019 start dates

We are passionate about developing our people, training and coaching to develop your technical analytical toolkit and soft skills is our top priority. We focus on recruiting Quantitative Analysts where we can see Partnership potential, and we support our people to progress from Analyst to Partner.

We are looking for candidates who are excited to work in an entrepreneurial environment, focussed on delivering impact.

Experience using advanced analytics / data manipulation software (Python, R, SPSS, MATLAB, SAS) is beneficial.

Come and meet us at the MIGSAA Industry Sandpit on 30 November 2018 from 12.15 at the Bayes Centre, Edinburgh. Ask Prof Gabriel Lord for more details on the Sandpit.
