

# The future of CombinatoricsWiki

Grahame Erskine

Open University

## **Abstract**

In this talk, I will discuss the current status of the various tables of extremal graphs and digraphs maintained on CombinatoricsWiki.

This site is a useful resource for many of the projects likely to be discussed at IWONT. I will give an overview of what is currently there, where the gaps are and which tables I think are potentially in need of refresh.

My view has always been that that this is a somewhat under-utilised resource, with significant opportunity for expansion of its scope. I will seek feedback on the future direction of the site, including editorial control and hosting arrangements.
