

Navigating your Early Career as a Young Black Mathematician: Insights and Impact.

Tobi George-Oyediran
Nottingham University

Some say you have to work twice as hard and be twice as good, for Black young adults entering the workforce from Mathematics, this still rings true. I will be sharing my lessons learnt on getting the right people to see your twice as hard work and making an impact with your twice as good work. I hold two Mathematics degrees and secured a Quant job two months before the end of my degree. This year, I've been part of programs with McKinsey, Deloitte, and UN Women UK. Get ready for my session – you don't want to miss this!
