

# **The Need for Black Role Models and Representation in Mathematics**

*Aris Winger*

Georgia Gwinnett College

Mathematics is the most influential subject in the world, past and present and future. What happens to the future for when the lack of representation persists? What does the future look like when the greatest of disciplines goes without the diversity that is key to success at the highest level? In this talk, we discuss the need for representation and how we can move the needle to make it happen.
